

The Belvedere Announces Expansion of Its Hit Roblox Experience *Art Leap*

December 19, 2025

A new adventure inspired by Max Oppenheimer's *The Philharmonics* is now available to play.

The Belvedere Museum launched *The Philharmonics*, the latest experience in the *Art Leap* adventure series on the Roblox platform. With its immersive worlds inspired by *The Kiss* by Gustav Klimt and *The Chef* by Claude Monet, *Art Leap* has attracted more than 2.5 million visits since its launch in February 2025, earning a 93 percent approval rating among players and a community of over 40,000 fans. Furthermore, it earned major industry acclaim, including the Best in Play award at the Game Developers Conference, the DigAMus Award – a German award for best digital projects of museums, and a finalist nomination at the Games for Change Awards.

New Experience: *The Philharmonic*

The latest addition brings Gustav Mahler and the atmosphere of Vienna's legendary orchestral tradition to Roblox for the very first time. Set in a grand concert hall, players arrive moments before a performance is about to begin—only to discover that key pieces of equipment have vanished.

Mahler himself appears as the main NPC, enlisting the player's help to save the evening's concert. Drawing visual and narrative cues from the Belvedere artwork, the new level offers a vibrant environment filled with musicians, audience members, and elegant architectural details that recreate the magic of Vienna's musical heritage.

Three Music-Themed Mini-Games

To retrieve the missing instruments, players take on three distinct mini-games that blend music, rhythm, and playful problem-solving:

- **Animated Sheet Music Obstacle Course**
An energetic platforming challenge where players climb, jump, and keep tempo while collecting scattered musical fragments.
- **Hidden-Object Scavenger Hunt**
A band-room search with randomized spawn points for endless replayability.

- **Conductor's Podium Rhythm Game**

A musical finale where players will conduct the orchestra, and skill will be paramount to playing the music to perfection.

Upon completing all challenges, players restore the concert and earn an exclusive violin pet as a commemorative reward.

About Art Leap

Each *Art Leap* adventure transforms a masterpiece from the Belvedere's collection into a fully realized, explorable world—inviting players to step inside iconic artworks, take on challenges, and experience their themes in an entirely new way. Besides *The Philharmonics*, *Art Leap* takes you into the worlds of Gustav Klimt's *The Kiss*, Jacques-Louis David's *Napoleon at the Great St. Bernard Pass*, Claude Monet's *The Cook (Le Père Paul)*, and Tina Blau's *Spring in the Prater*. *Art Leap* has been selected as the only museum experience included in the Roblox Learning Hub so far. *Art Leap* was produced and developed in cooperation with Exclusible and Playerthree.

Continued Leadership in Cultural Innovation

With this new chapter, the Belvedere reinforces its role as a pioneer in cultural innovation—using technology to make art education more engaging and accessible for younger generations. By embracing Roblox, the world's largest platform for authentically reaching Gen Z and Gen A, the museum continues to meet audiences where they already play and learn.

Commitment to Child Safety

Art Leap by Belvedere Museum is governed & subject to Roblox Privacy Policies. To ensure a safe and age-appropriate experience for young players, comprehensive [child protection measures](#) have been programmed into the game functions.
